The Scottsdale office will be managed by Bill Bauer. Bill has been involved with construction software and technology since 1989. In 2001, Bill was selected as the exclusive Master Builder Solution Provider for Arizona and New Mexico providing sales, training and support. In 2006, Bill left to pursue other interests but remained involved with construction software and technology. He is excited to once again represent the Sage construction software products. The Scottsdale office has a team of consultants providing solution selection assistance, system implementations, data conversions, initial and ongoing training, and custom reports or functionality. Bill plans to focus the Scottsdale team on helping clients maximize the functionality of their software investment. The Scottsdale Office can be contacted at (623)321-3443.

The Littleton Office will be managed by Pam Schulz. Pam has been involved with Master Builder for 17 years and has been involved with over 500 implementations. She is an expert with the Master Builder Report Writer in addition to all of the Master Builder accounting, project management and estimating modules. Pam was the Regional Area Manager in Colorado for Master Builder when it was owned by Omware and Intuit and has been working with CFO on the go for the past five years in the Nevada and California offices. The Littleton Office will provide training with a team of certified consultants, hosting workshops to help current users maximize their investment in their estimating, accounting or project management software. Pam can be reached at (303) 586-6445.

CFO on the go offers free webinars for their clients. CFO on the go just completed a series of eight workshops to introduce Sage Master Builder Version 14. Upcoming events include weekly "tips to a successful year end close," we host these events over the internet to reduce costs.

CFO on the go also provides a newsletter for their clients; in addition we also offer whitepapers on industry topics as they become available. Want a copy of our latest newsletter entitled “9 Tips to Surviving the Recession and Building a Stronger Business”? Please send an email to our Customer Care Manager at [amyc@cfosontheho.net](mailto:amyc@cfosontheho.net)

“I sincerely believe this is the right time for CFO on the go to make this move. Making this type of investment in these unpredictable times is difficult, but we are certain that when the economy turns around there will be contractors who will want to improve their operations and those improvements will come from making the move to an industry specific solution, not some off the shelf package.” Quote from Dennis Feidner CFO’s President and CEO

### **About CFO on the go, co**

Chief Financial Officer on the go is a leading construction oriented services firm that assists and guides contractors to growing their organizations through technology and good sound business processes. CFO on the go is comfortable with construction contractors whether they are developers, GCs, homebuilders or specialty contractors. Within our 900 current clients, the annual revenues range from under \$1 million dollars to close to \$1 billion dollars. Our professional consultants are all former accountants or estimators in the construction industry. CFO on the go is a Sage Authorized provider of [project management software](#) for the construction industry including Sage Timberline Office and Sage Master Builder.
