

Sage Timberline Office

Crystal Reports

Crystal Reports® version 10.0 professional edition is available as a limited license solution for Sage Timberline Office data. It transforms your information into presentation-quality reports.

Simple design tools and built-in assistance guide you through common report-building tasks such as connecting to your data source, selecting fields and records, grouping, sorting, and formatting. Templates provide many standard formatting options letting you easily select colors and fonts, include images, and add other elements such as your company logo. Report templates, including both formatting and data access operations, can be customized, saved, and applied consistently across a variety of reports.

Features and efficiencies

- Create exactly the report you need including cross-tab, conditional, drill-down, summary, and more.
- Tap into built-in functions or customize as you wish to control formatting, logic, and data selection.
- Choose pre-defined formatting options or customize for the look you prefer.
- Expedite report design by storing key report elements including commands, text, images, and custom functions. Store, share, and reuse at any time.
- Easily update information across multiple reports.

BENEFITS

- Presentation quality reports at the touch of a button
- Multiple templates available for fast customization

Information Assistant is a part of Sage Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.
