

Sage Timberline Office

Service Purchasing

Added to Sage Timberline Office's core Service Management software, Service Purchasing provides tight management control over service-related purchases.

Parts purchases required by service technicians are linked by this software to your work orders and purchase orders. You're able to easily track and quickly match vendor invoices to purchase orders and, as needed, automatically update inventory, parts costs, and more.

Purchase order control

- Ensure accuracy by matching vendor invoices to purchase order.
- Automatically update inventory part costs.
- Assign purchase order numbers to the system automatically or manually.
- Attach purchase orders to fixed-price jobs in order to track costs.
- Credit purchase orders for core returns and RMAs.
- Automatically attach purchase orders to work orders and invoices.

Service Purchasing is a part of Sage Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.

BENEFITS

- Increase profitability with more accuracy from parts purchases made in the field
- Quickly match vendor invoices to purchase orders

| Type | Description | Product | On Order | Unit | Unit Price |
|------------|---------------------|---------|----------|------|------------|
