

Sage Timberline Office

System Requirements

The hardware and software requirements below provide a general guideline for your information. Additional requirements may be necessary depending on specific software application purchase.

For more information, contact your Sage Timberline Office business partner, or submit an information request.

Supported Operating Systems

- Microsoft® Windows Server™ 2003 Enterprise Edition SP2
- Windows Server™ 2003 Standard Edition SP2
- Windows Server 2003 R2
- Windows Small Business Server™ 2003 SP2
- Windows® XP Professional SP2
- Windows Vista (Business and Ultimate) SP1
- Windows Server 2008

Processor

- P4-2 GHz
- 2 GB RAM

Hard Disk Space

- Accounting and Management Products on a server or stand-alone computer: 600 MB available disk space plus 25 MB per accounting and management application.¹
- Accounting and Management Products on a workstation: 295 MB available disk space (This assumes a server hosts accounting and management data.)¹
- Estimating Products on a server, workstation, or stand-alone computer: 260 MB available disk space.¹
- Residential Management on a server, workstation, or stand-alone computer: 580 MB.

¹Add up to 400 MB for required third-party components, which Sage Timberline Office installs as necessary.

Server		
Product	Hard disk space	Notes
Document Management	100-200 MB 600 MB Estimate	For program files (depends on configuration). For data per year (assuming that you scan 12,000 B/W pages and print 1,200 B/W pages to DocuVault).
Other acct and mgmt products	600 MB plus 25 MB per app	For program files. This amount also applies to a stand-alone installation.
Estimating products	260 MB	For program files.
Residential Management	580 MB	For program files.
Components	Up to 400 MB	Required for third-party components. Sage Timberline applications install these components as necessary.

Workstation		
Product	Hard disk space	Notes
Document Management	20-100 MB	For program files (depends on configuration).
Other acct and mgmt products	295 MB	For program files. This assumes that a server hosts accounting and management data.
Estimating products	260 MB	For program files.
Residential Management	580 MB	For program files.
Components	Up to 400 MB	Required for third-party components. Sage Timberline applications install these components as necessary.

Other Requirements

- CD-ROM drive
- Crystal Reports® Professional or Sage Timberline Office's Crystal Reports (Required to modify or create Crystal Reports designs)
- High-quality network interface card
- Sound card
- SVGA monitor (800 x 600 pixels; 1024 x 768 pixels recommended for Project Management and Database Editor, 17 inch monitor at 1024x768 resolution recommended for Document Management)
- Scanner that is TWAIN compliant (required to scan documents with Document Management)
- USB port at server for USB security key (Required for Document Management)
- Microsoft® Internet Explorer 6.0 (Service Pack 1)
- Microsoft® Outlook® 2003 SP3 (Required to use e-mail features)
- Printer
- WinFax Pro 10.0, 10.01, or 10.03 (Required to send faxes in applications with this feature)
- UniMessage Pro™ (Supported for on-line faxing in Purchasing and Inventory)
- Microsoft Office 2003 SP3 (Microsoft Office is required to use Project Management Correspondence Log features. If you use Microsoft Office 2003, you need to install Service Pack 3 in order to run the Correspondence Log)

Other Requirements—Estimating Only

Digitizers

- 32-bit WinTAB digitizer driver software (Supplied by your digitizer manufacturer)
- USB port or digitizing tablet connected to RS-232 serial port configured as COM1 or COM2

Sentinel Protection Device

Sage Timberline Office supports Sentinel SuperPro protection devices.

Estimating products automatically install the Sentinel system driver if one is not already installed. To install this driver manually, run: D:\AdditionalInstalls\SentinelDrivers\Sentinel Protection Installer.exe (D:\ represents your CD-ROM drive). Alternately, you can download the driver from www.safenet-inc.com.

Supported Protocols

- TCP/IP: Transmission Control Protocol/Internet Protocol. Microsoft servers default to this protocol
- RDP 5: Remote Display Protocol. Microsoft remote protocol, which is used in its remote connection applications
- ICA: Independent Computing Architecture. Citrix remote protocol, which is used in its remote connection application
